# ANDERSON COUNTY

<b>Date Formed:</b>	1826
<b>Land Area (square miles):</b>	718
<b>County Seat:</b>	Anderson
<b>Other Cities and Towns:</b>	Belton, Clemson, Honea Path, Iva, Pelzer, West Pelzer, Pendleton, Starr, Williamston
<b>Form of Government:</b>	Council-Administrator
<b>Council Members:</b>	7
<b>Method of Election:</b>	Single Member
<b>Term Length:</b>	2 years
<b>Council of Government:</b>	Appalachian

## County History

Anderson County and its county seat were named for Revolutionary War General Robert Anderson (1741-1812). This region was occupied by the Cherokee Indians until 1777, when it was ceded by treaty to the state. Part of the "Indian Land" became Pendleton District (also called Washington District at one time). The area was given its present name in 1826, when Pendleton District was split into Anderson and Pickens. Most of the early settlers of this area were Scotch-Irish farmers who moved south from Pennsylvania and Virginia in the eighteenth century. The oldest town in the county is Pendleton, which was founded around 1790; it became a popular summer resort for lowcountry planters in the nineteenth century. Some famous residents of Anderson County were U.S. Senator and South Carolina Governor Olin D. Johnston (1896-1965), business leader Charles E. Daniel (1895-1964), and composer Lily Strickland (1884-1958).

# OCONEE COUNTY

<b>Date Formed:</b>	1868
<b>Land Area (square miles):</b>	625
<b>County Seat:</b>	Walhalla
<b>Other Cities and Towns:</b>	Salem, Seneca, West Union, Westminster
<b>Form of Government:</b>	Council-Administrator
<b>Council Members:</b>	5
<b>Method of Election:</b>	Single Member
<b>Term Length:</b>	4 years
<b>Council of Government:</b>	Appalachian

## County History

Oconee County, which was formed in 1868 from Pickens County, takes its name from an Indian word. This area in the northwest corner of the state on the edge of the Blue Ridge Mountains was home to several Indian tribes, including the Creeks and the Cherokees, but the Indians gave up their lands in treaties signed in 1777 and 1785. After the American Revolution, settlers from other parts of the state began moving in, including the Germans from Charleston who founded the town of Walhalla in 1850. In 1856 work began on a tunnel for the Blue Ridge Railroad that would have linked Charleston with Knoxville, Tennessee, but the Civil War ended that project; the unfinished Stumphouse Tunnel can still be seen today. Several Revolutionary War heroes moved to present day Oconee County after the war, including Andrew Pickens (1739-1817), Robert Anderson (1741-1813), and Benjamin Cleveland (1738-1806).

# PICKENS COUNTY

<b>Date Formed:</b>	1826
<b>Land Area (square miles):</b>	497
<b>County Seat:</b>	Pickens
<b>Other Cities and Towns:</b>	Central, Clemson, Easley, Liberty, Norris, Six Mile
<b>Form of Government:</b>	Council-Administrator
<b>Council Members:</b>	6
<b>Method of Election:</b>	Single Member
<b>Term Length:</b>	4 years
<b>Council of Government:</b>	Appalachian

## County History

Pickens County was named for Revolutionary War hero Andrew Pickens (1739-1817). This area in the northwestern corner of the state was Indian territory until 1777. It subsequently became part of Pendleton District (at one time called Washington District). In 1826 Pendleton was divided into two counties, Pickens and Anderson; the western portion of Pickens County was later split off to form Oconee County (1868). The earliest European settlers in this region were Indian traders. The British built Fort Prince George around 1753 as protection against the Indians, and the fort was the site of several battles in the Cherokee War of 1756. The Cherokee town of Old Seneca was later destroyed by American troops in 1776. John C. Calhoun (1782-1850), U.S. Vice President, Senator, and cabinet member, made his home at Fort Hill plantation in Pickens County. His son-in-law, Thomas Green Clemson (1807-1888), bequeathed the plantation to the state for use as an agricultural college, which led to the founding of Clemson University.

# COUNTY CREDIT RATINGS

## Credit Ratings FY 2015

County	Fitch	Moody's	S&P
1. Abbeville			
2. Aiken		Aa2	AA
3. Allendale			
4. Anderson		Aa2	
5. Bamberg			AA
6. Barnwell			
7. Beaufort	AA	Aa1	AA
8. Berkeley		Aa2	AA
9. Calhoun			
10. Charleston	AAA	Aaa	AAA
11. Cherokee			
12. Chester			A+
13. Chesterfield			
14. Clarendon			A+
15. Colleton		Aa3	AA-
16. Darlington			A-
17. Dillon			
18. Dorchester		Aa2	AA-
19. Edgefield			
20. Fairfield			
21. Florence		Aa2	AA
22. Georgetown		Aa2	AA
23. Greenville	AAA	Aaa	
24. Greenwood		Aa3	A+
25. Hampton		A3	
26. Horry	AA+	Aa2	AA
27. Jasper			A+
28. Kershaw	AA+	Aa2	
29. Lancaster		Aa2	
30. Laurens		A1	AA
31. Lee			
32. Lexington		Aa1	
33. Marion			
34. Marlboro		A1	
35. McCormick			
36. Newberry		Aa3	
37. Oconee		Aa2	AA
38. Orangeburg	A	A2	AA
39. Pickens	AA	Aa2	
40. Richland		Aa1	AAA
41. Saluda			
42. Spartanburg	AA	Aa3	
43. Sumter		Aa2	AA-
44. Union		A1	
45. Williamsburg		A3	BBB
46. York		Aa1	AA+
South Carolina	AAA	AAA	AA-

Ratings Defined		
Fitch	AAA	Highest credit quality
	AA	Very high credit quality
	A	High credit quality
	BBB	Good credit quality
Moody's	Aaa	Exceptional financial security
	Aa	Excellent financial security
	A	Good financial security
	Baa	Adequate financial security
S&P	AAA	Extremely strong capacity
	AA	Very strong capacity
	A	Strong capacity
	BBB	Adequate capacity

Note: In some cases, Fitch and Standard & Poor's use a plus or minus sign to show relative standing within a rating category. Similarly, Moody's uses the numerical modifiers 1, 2, and 3 with 1 signifying the higher end of a rating category and 3 signifying the lower end.

# Driving Organizational Success Through Our People

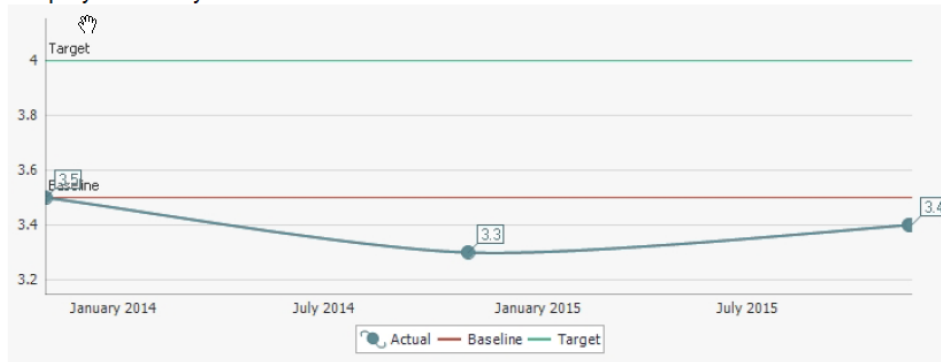

1.1 Improve ratings by employees of communication on the Noel-Levitz Employee survey

1.2 Improve leadership and accountability by embedding competencies in all job descriptions

1.3 Improve ratings by employees of the campus climate on the Noel-Levitz Employee Survey

Noel Levitz employee survey results updated November of each year

Competency progress updated April of each year to coincide with EPMS cycle

# Reinventing Our Offerings to Adapt to Changing Realities

2.1 Adapt our offerings through the use of program prioritization planning.

Updated yearly at the conclusion of the academic year

2.2 Reinvent our offerings to meet program-specific enrollment goals

Updated yearly in October to coincide with State reporting

# Embracing Personal Accountability for Student Learning

4.1 Embrace accountability for student learning by improving student ratings on the Community College Survey of Student Engagement Active and Collaborative Learning benchmark

4.2 Promote student success by fostering higher student persistence

4.3 Promote student success by fostering higher student retention

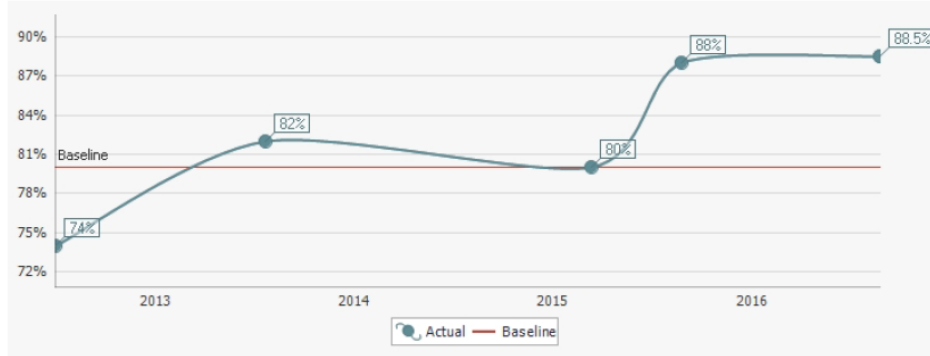

CCSSE benchmarks: updated biennially

Persistence rate: updated yearly in September

Retention rate: updated yearly in September

# Positioning and Equipping Students for Success

3.1 Effectively position students for employment by maintaining graduate placement rates

3.2 Improve student engagement by improving student ratings on the Community College Survey of Student Engagement Support for Learners benchmark

3.3 Increase student success by increasing the number of students who graduate, transfer, or remain enrolled

Graduate placement rate: updated yearly in September

CCSSE benchmarks: updated biennially

Success Rate: updated yearly in October

# Community College Survey of Student Engagement

Tri-County Technical College

**2016 Key Findings**

## **Table of Contents**

Key Findings: A Starting Point	2
Benchmarks of Effective Educational Practice	3
Aspects of Highest Student Engagement	4
Aspects of Lowest Student Engagement	5
2016 <i>CCSSE</i> Special-Focus Items	6
<i>CCFSSE</i>	8

## Key Findings: A Starting Point

The Key Findings report provides an entry point for reviewing results from your administration of the 2016 Community College Survey of Student Engagement (CCSSE). The report provides college-specific data in an easy-to-share format including benchmark comparisons between the college, top-performing colleges, and the CCSSE cohort. It also highlights aspects of highest and lowest student engagement at the college, as well as results from five CCSSE special-focus items. Select faculty survey data are also highlighted.

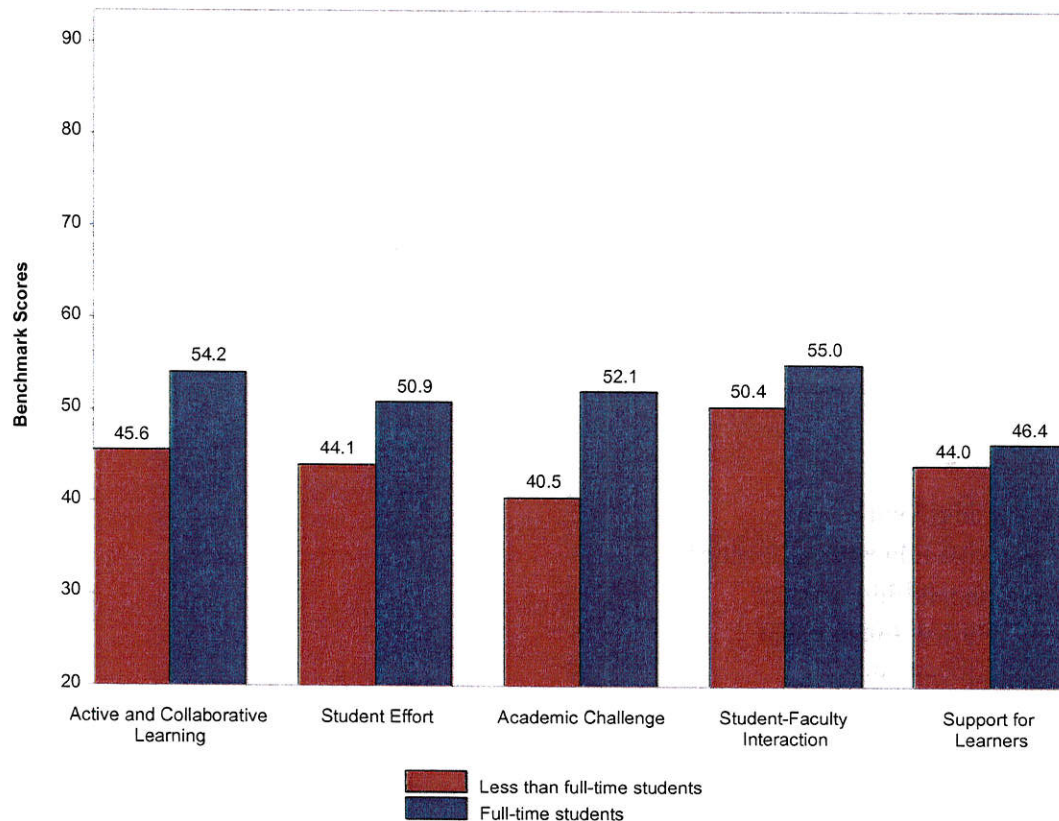

### Community College Student Part-Timeness

In each annual administration, the Center for Community College Student Engagement has included special-focus items on CCSSE to allow participating colleges and national researchers to delve more deeply into student experiences and areas of institutional performance of greatest interest to the field. Five items designed to elicit information about community college students and part-timeness were added to the 2016 CCSSE administration. The results of these findings are on pages 6-7 of this report.

### Benchmark Overview by Enrollment Status

Figure 1 below represents your institution's CCSSE benchmark scores by student enrollment status.

Figure 1

## Benchmarks of Effective Educational Practice

The *CCSSE* benchmarks are groups of conceptually related survey items that address key areas of student engagement. The five benchmarks denote areas that educational research has shown to be important to students' college experiences and educational outcomes. Therefore, they provide colleges with a useful starting point for looking at institutional results and allow colleges to gauge and monitor their performance in areas that are central to their work. In addition, participating colleges have the opportunity to make appropriate and useful comparisons between their performance and that of groups of other colleges.

Performing as well as the national average or a peer-group average may be a reasonable initial aspiration, but it is important to recognize that these averages are sometimes unacceptably low. Aspiring to match and then exceed high-performance targets is the stronger strategy.

Community colleges can differ dramatically on such factors as size, location, resources, enrollment patterns, and student characteristics. It is important to take these differences into account when interpreting benchmark scores—especially when making institutional comparisons. The Center for Community College Student Engagement has adopted the policy “Responsible Uses of *CCSSE* and *SENSE* Data,” available at [www.ccsse.org](http://www.ccsse.org).

*CCSSE* uses a three-year cohort of participating colleges in all core survey analyses. The current cohort is referred to as the 2016 *CCSSE* Cohort (2014-2016) throughout all reports.

### CCSSE Benchmarks

#### ★ Active and Collaborative Learning

Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with real-life situations and problems.

#### ★ Student Effort

Students' own behaviors contribute significantly to their learning and the likelihood that they will successfully attain their educational goals.

#### ★ Academic Challenge

Challenging intellectual and creative work is central to student learning and collegiate quality. These survey items address the nature and amount of assigned academic work, the complexity of cognitive tasks presented to students, and the rigor of examinations used to evaluate student performance.

#### ★ Student-Faculty Interaction

In general, the more contact students have with their teachers, the more likely they are to learn effectively and to persist toward achievement of their educational goals. Through such interactions, faculty members become role models, mentors, and guides for continuous, lifelong learning.

#### ★ Support for Learners

Students perform better and are more satisfied at colleges that provide important support services, cultivate positive relationships among groups on campus, and demonstrate commitment to their success.

For further information about *CCSSE* benchmarks, please visit [www.ccsse.org](http://www.ccsse.org).

Figure 2

\*Top-Performing colleges are those that scored in the top 10 percent of the cohort by benchmark.

Notes: Benchmark scores are standardized to have a mean of 50 and a standard deviation of 25 across all respondents. For further information about how benchmarks are computed, please visit [www.ccsse.org](http://www.ccsse.org).

## Aspects of Highest Student Engagement

Benchmark scores provide a manageable starting point for reviewing and understanding *CCSSE* data. One way to dig more deeply into the benchmark scores is to analyze those items that contribute to the overall benchmark score. This section features the five items across all benchmarks (excluding those for which means are not calculated) on which the college scored highest and the five items on which the college scored lowest relative to the 2016 *CCSSE* Cohort.

The items highlighted on pages 4 and 5 reflect the largest differences in mean scores between the institution and the 2016 *CCSSE* Cohort. While examining these data, keep in mind that the selected items may not be those that are most closely aligned with the college's goals; thus, it is important to review all institutional reports on the *CCSSE* online reporting system at [www.ccsse.org](http://www.ccsse.org).

Figure 3 displays the aggregated frequencies for the items on which the college performed most favorably relative to the 2016 *CCSSE* Cohort. For instance, 29.3% of Tri-County Technical College students, compared with 25.4% of other students in the cohort, responded *often* or *very often* on item 4g. It is important to note that some colleges' highest scores might be lower than the cohort mean.

Figure 3

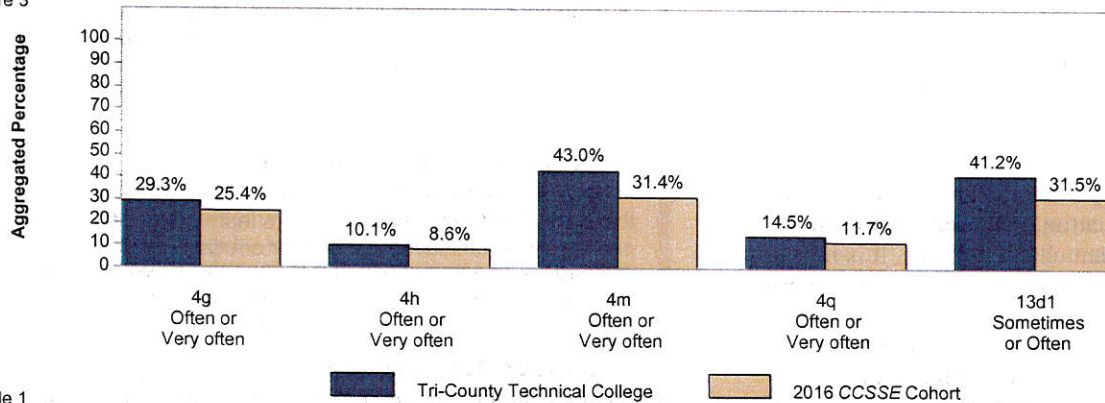

Table 1

Benchmark	Item Number	Item
Active and Collaborative Learning	4g	Worked with classmates outside of class to prepare class assignments
Active and Collaborative Learning	4h	Tutored or taught other students (paid or voluntary)
Student-Faculty Interaction	4m	Talked about career plans with an instructor or advisor
Student-Faculty Interaction	4q	Worked with instructors on activities other than coursework
Student Effort	13d1	Frequency: Peer or other tutoring

Notes:

For Item(s) 4 (except 4e), *often* and *very often* responses are combined.

For Item(s) 13, *sometimes* and *often* responses are combined.

## Aspects of Lowest Student Engagement

Figure 4 displays the aggregated frequencies for the items on which the college performed least favorably relative to the 2016 *CCSSE* Cohort. For instance, 56.8% of Tri-County Technical College students, compared with 63.3% of other students in the cohort, responded *quite a bit* or *very much* on item 5c. It is important to note that some colleges' lowest scores might be higher than the cohort mean.

Figure 4

Table 2

Benchmark	Item Number	Item
Academic Challenge	5c	Synthesizing and organizing ideas, information, or experiences in new ways
Student Effort	6b	Number of books read on your own (not assigned) for personal enjoyment or academic enrichment
Support For Learners	9c	Encouraging contact among students from different economic, social, and racial or ethnic backgrounds
Support For Learners	9d	Helping you cope with your non-academic responsibilities (work, family, etc.)
Support For Learners	9e	Providing the support you need to thrive socially

Notes:

For Item(s) 5, *quite a bit* and *very much* responses are combined.

For Item(s) 6, 5 to 10, 11 to 20, and *more than 20* responses are combined.

For Item(s) 9, *quite a bit* and *very much* responses are combined.

## 2016 CCSSE Special-Focus Items

The Center adds special-focus items to *CCSSE* each year to augment the core survey, helping participating colleges and the field at large to further explore fundamental areas of student engagement. The 2016 special-focus items elicit new information about students' experiences associated with enrollment status such as persistence, goals, expectations for time to completion, and knowledge about whether or not instructors teach full time at their college. Frequency results from the first five special focus module items for your college and the 2016 *CCSSE* Part-Timeness item-set respondents are displayed across pages 6 and 7.

Figure 5: Including this term, but excluding summers, how many academic terms have you been enrolled at this college?

Figure 6: Of the academic terms you have been enrolled at this college but excluding summers, how many academic terms have you been enrolled full time?

Figure 7: What is your number one goal for attending this college?

Figure 8: From the time you started here, how long do you anticipate it will take you to complete your certificate or degree at this college?

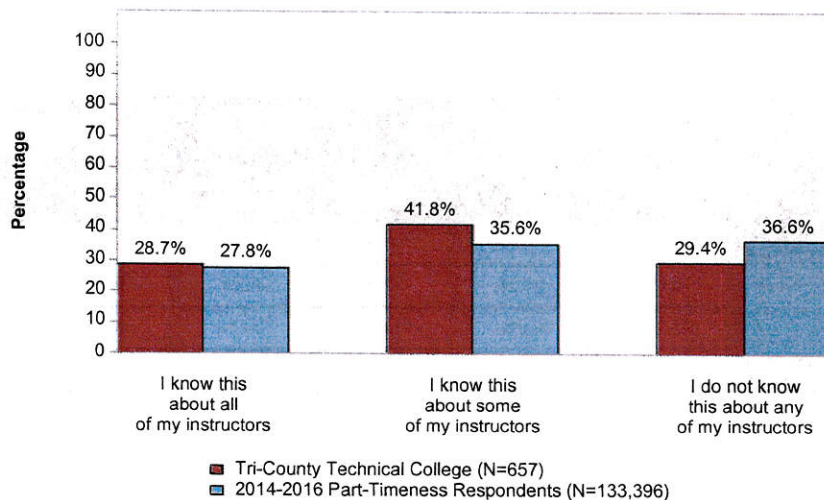

Figure 9: Do you know if your instructors this academic term teach full time or part time at this college?

# CCFSSE

The Community College Faculty Survey of Student Engagement (*CCFSSE*), designed as a companion survey to *CCSSE*, elicits information from faculty about their perceptions regarding students' educational experiences, their teaching practices, and the ways they spend their professional time—both in and out of the classroom. *CCFSSE* data suggest that at most colleges, part-time faculty outnumber full-time faculty, and are also less likely to refer students to academic support services. Below you will find frequency results for part- and full-time faculty at your college describing how frequently they refer students to advising and planning services, peer tutoring, and skill labs. *CCFSSE cohort respondent data are provided.*

Figure 10: How often do you refer students to the following services?

Table 3

Response	Academic Advising/ Planning		Peer or Other Tutoring		Skill Labs (writing, math, etc.)	
	Full-Time Faculty	Part-Time Faculty	Full-Time Faculty	Part-Time Faculty	Full-Time Faculty	Part-Time Faculty
N.A.	1.6%	4.3%	1.4%	3.9%	4.7%	7.5%

Notes:

Percentages may not add up to 100% in each category due to missing data and/or rounding.  
 All population data are those reported by institutions for the most recent IPEDS enrollment report.  
 Respondents include only data used in the national CCSSE analysis. Some data were excluded in accordance with CCSSE data exclusion rules.

## Benchmarks of Effective Practice

### *Active and Collaborative Learning*

Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with the kinds of situations and problems they will encounter in the workplace, the community, and their personal lives.

#### **CCSSE Items**

4a	Frequency: Asked questions in class or contributed to class discussions
4b	Frequency: Made a class presentation
4f	Frequency: Worked with other students on projects during class
4g	Frequency: Worked with other classmates outside of class to prepare class assignments
4h	Frequency: Tutored or taught other students (paid or voluntary)
4i	Frequency: Participated in a community-based project as part of a regular course
4r	Frequency: Discussed ideas from your readings or classes with others outside of class (students, family members, co-workers, etc.)

### *Student Effort*

Students' behaviors contribute significantly to their learning and the likelihood that they will attain their educational goals. "Time on task" is a key variable, and there are a variety of settings and means through which students may apply themselves to the learning process.

#### **CCSSE Items**

4c	Frequency: Prepared two or more drafts of a paper or assignment before turning it in
4d	Frequency: Worked on a paper or project that required integrating ideas or information from various sources
4e	Frequency: Come to class without completing readings or assignments
6b	Number of books read on your own (not assigned) for personal enjoyment or academic enrichment
10a	Hours spent per week: Preparing for class (studying, reading, writing, rehearsing, doing homework, or other activities related to your program)
13d1	Frequency of use: Peer or other tutoring
13e1	Frequency of use: Skill labs (writing, math, etc.)
13h1	Frequency of use: Computer lab

### *Academic Challenge*

Challenging intellectual and creative work is central to student learning and collegiate quality. Ten survey items address the nature and amount of assigned academic work, the complexity of cognitive tasks presented to students, and the standards faculty members use to evaluate student performance.

#### **CCSSE Items**

4p	Frequency: Worked harder than you thought you could to meet an instructor's standards or expectations
5b	Amount of emphasis in coursework: Analyzing the basic elements of an idea, experience, or theory

## Academic Challenge (continued)

### CCSSE Items

5c	Amount of emphasis in coursework: Synthesizing and organizing ideas, information, or experiences in new ways
5d	Amount of emphasis in coursework: Making judgments about the value or soundness of information, arguments, or methods
5e	Amount of emphasis in coursework: Applying theories or concepts to practical problems or in new situations
5f	Amount of emphasis in coursework: Using information you have read or heard to perform a new skill
6a	Number of assigned textbooks, manuals, books, or book-length packs of course readings
6c	Number of written papers or reports of any length
7	Rate the extent to which your examinations have challenged you to do your best work
9a	Amount of emphasis by college: Encouraging you to spend significant amounts of time studying

### Student-Faculty Interaction

In general, the more interaction students have with their teachers, the more likely they are to learn effectively and persist toward achievement of their educational goals. Personal interaction with faculty members strengthens students' connections to the college and helps them focus on their academic progress. Working with an instructor on a project or serving with faculty members on a college committee lets students see first-hand how experts identify and solve practical problems. Through such interactions, faculty members become role models, mentors, and guides for continuous, lifelong learning.

### CCSSE Items

4k	Frequency: Used e-mail to communicate with an instructor
4l	Frequency: Discussed grades or assignments with an instructor
4m	Frequency: Talked about career plans with an instructor or advisor
4n	Frequency: Discussed ideas from your readings or classes with instructors outside of class
4o	Frequency: Received prompt feedback (written or oral) from instructors on your performance
4q	Frequency: Worked with instructors on activities other than coursework

### Support for Learners

Students perform better and are more satisfied at colleges that are committed to their success and cultivate positive working and social relationships among different groups on campus. Community college students also benefit from services targeted to assist them with academic and career planning, academic skill development, and other areas that may affect learning and retention.

### CCSSE Items

9b	Amount of emphasis by college: Providing the support you need to help you succeed at this college
9c	Amount of emphasis by college: Encouraging contact among students from different economic, social, and racial or ethnic backgrounds
9d	Amount of emphasis by college: Helping you cope with your non-academic responsibilities (work, family, etc.)
9e	Amount of emphasis by college: Providing the support you need to thrive socially
9f	Amount of emphasis by college: Providing the financial support you need to afford your education
13a1	Frequency of use: Academic advising/planning
13b1	Frequency of use: Career counseling
